Kiwa Mission and Vision

Mission

We create trust by contributing to the transparency of the quality, safety and sustainability of products, processes, organizations as well as of personal and environmental performance.

Vision

We strive to be an autonomous World Top 20 TIC organisation working close to our customers to serve them with our one stop shop for testing, inspection and certification, strengthened by training, technology and data services. We are a Partner for Progress: impartial, innovative and engaged.

Kiwa Italy Group

Kiwa Cermet Italia is an Italian well-known and reputed company, which operates as an independent body for the certification of goods, services, systems and persons and for the verification, testing and calibration of products and equipment.

Kiwa Cermet Italia has a special focus on the mechanical and machinery industry, automotive, aeronautics and aerospace, medical devices and health sector, food products, gas, water and energy.

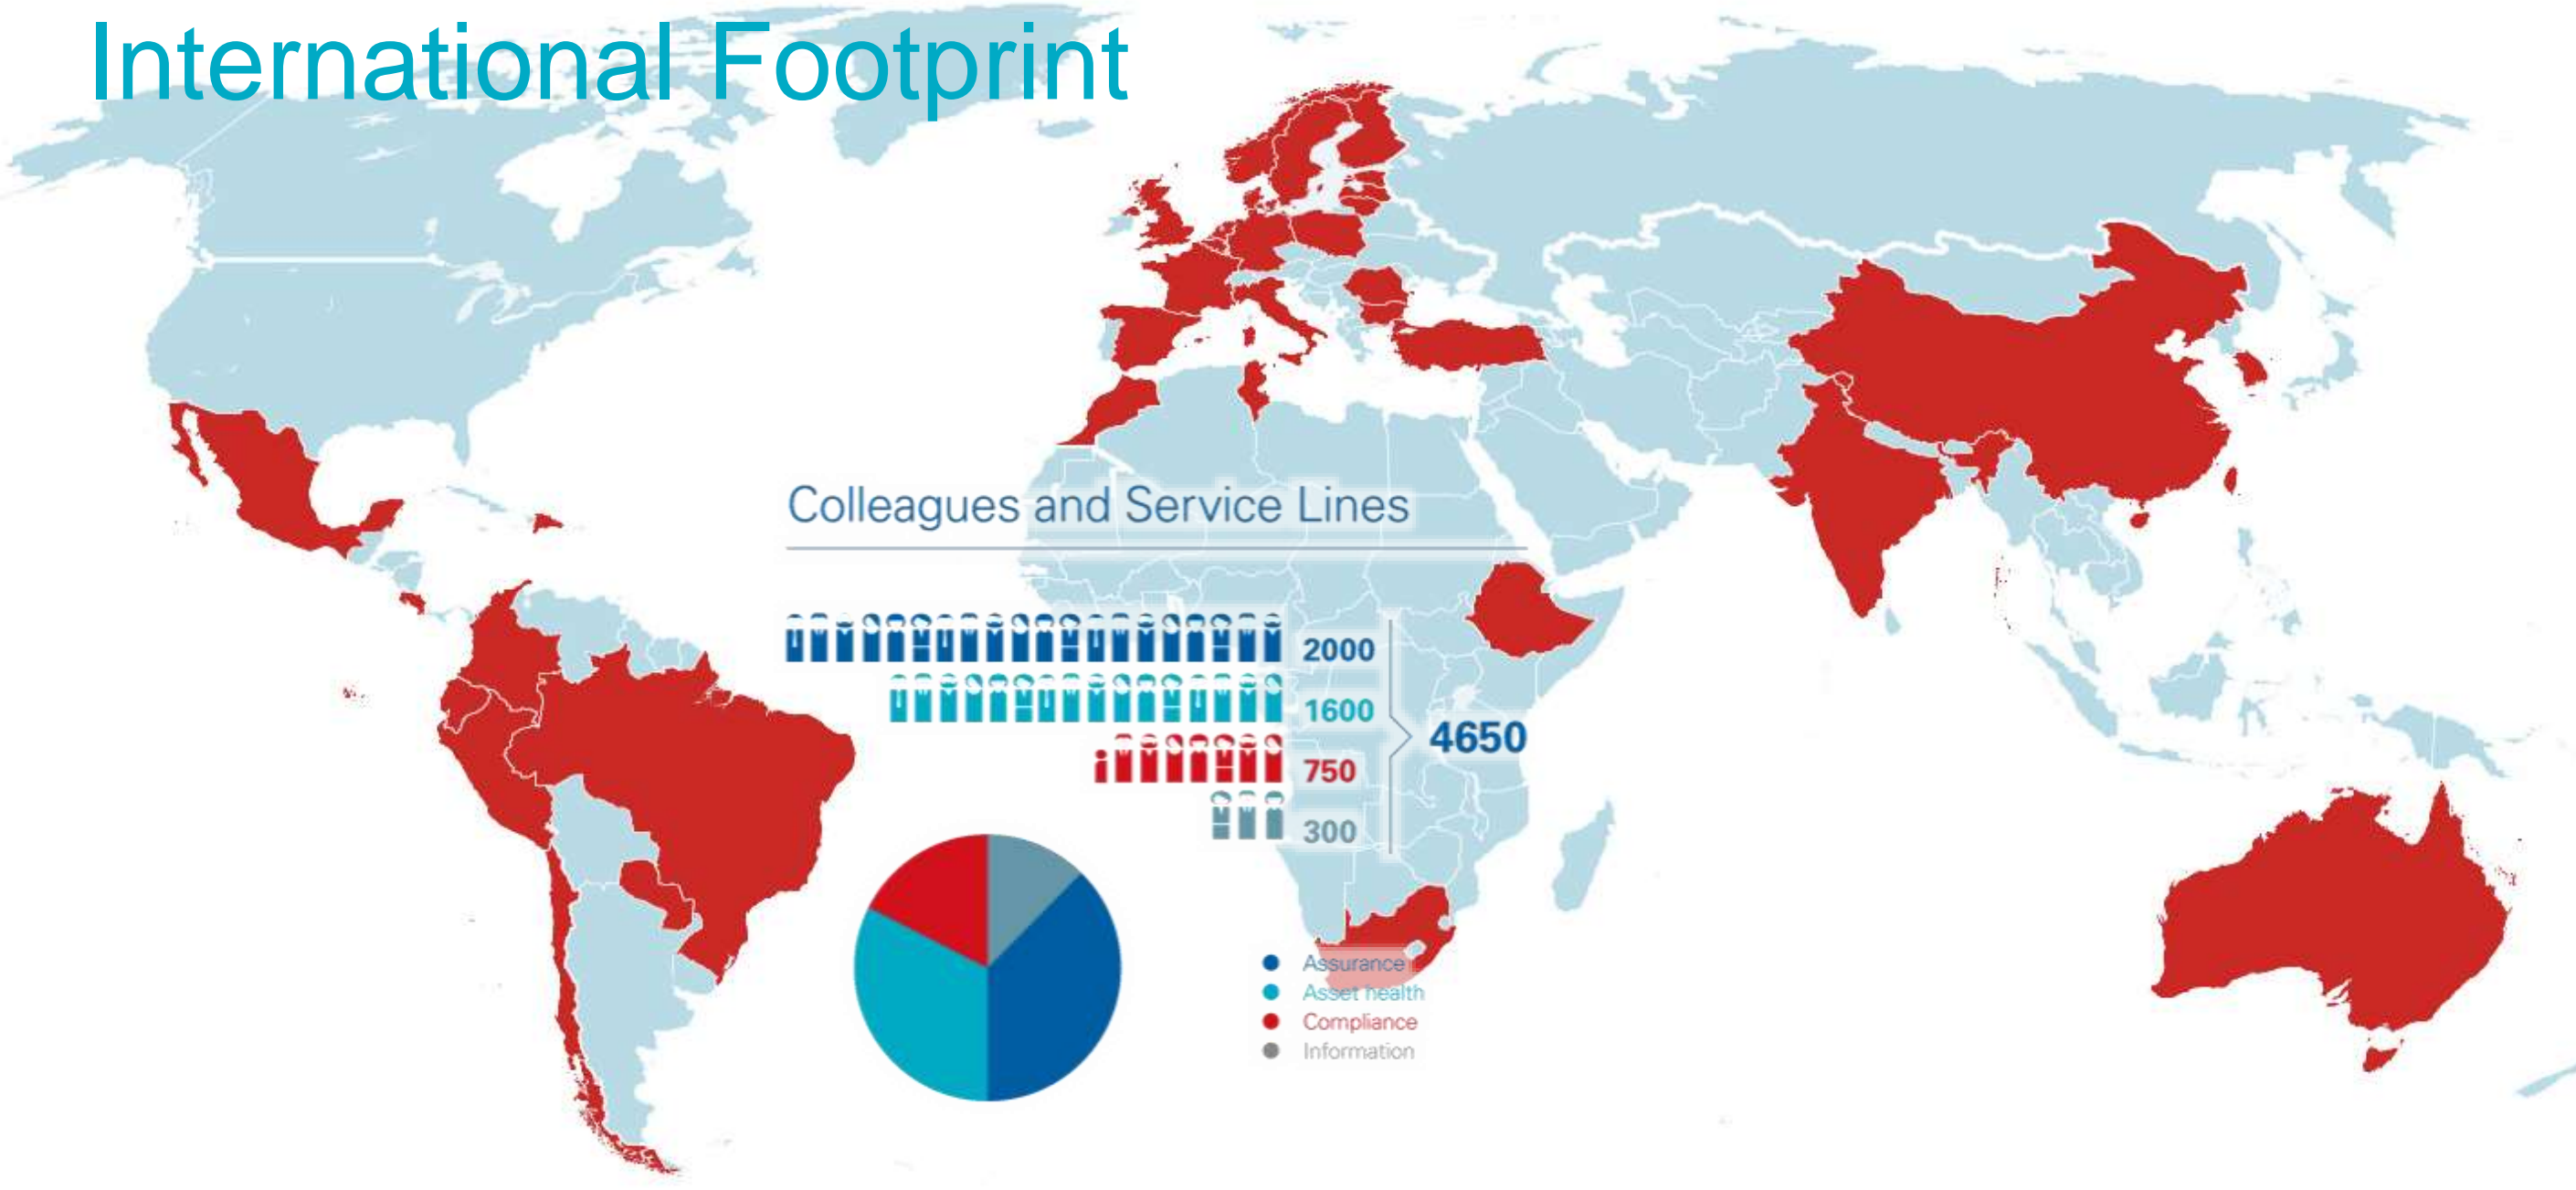

Our Presence in Italy

- More than **160** Employees
- More than **500** Auditors
- More than **9.000** MS certified Companies
- More than **3.000** certified Products
- More than **11.000** Customers

International Footprint

Gli specialisti della Filiera Animale

In Olanda, **Kiwa CMR** è leader nel settore delle ispezioni nelle filiere suinicole. Svolge per conto delle autorità competenti i controlli ufficiali nelle filiere animali, sia per gli aspetti igienico sanitari che qualitativi delle carcasce.

Inoltre è leader nelle certificazioni BETER LEVEN e IKB, essendone stato anche uno dei principali promotori.

Nel Regno Unito, **Kiwa PAI** è stato il promotore del marchio RED TRACTOR e oggi possiede l'unico standard sul benessere animale accreditato UKAS: International Pig Scheme.

CERTIFICAZIONE

è l'atto mediante il quale
un organismo indipendente,
seguendo un metodo e regole definite,
attesta che

un sistema di gestione, un prodotto o un processo
sono conformi
a precisi requisiti
preventivamente specificati
in documento
denominato
Norma o Documento Tecnico .

NORMA o DOCUMENTO TECNICO

Documento prodotto mediante consenso e approvato da un organismo riconosciuto, che fornisce per usi comuni e ripetuti

regole, linee guida o caratteristiche, relative a determinate attività e ai loro risultati,

al fine di ottenere il miglior ordine in un determinato contesto.

 - 5.4 Step 3 — Implementation of the animal welfare plan
 - 5.5 Step 4 — Evaluation and review
- Annex A Animal welfare thresholds for animals

Available in:

1 Scope

This document provides requirements and guidance for the implementation of the animal welfare principles as described in the introduction to the recommendations for animal welfare of the OIE TAHC (Chapter 7.1).

This document applies to terrestrial animals bred or kept for the production of food or feed. The following areas are excluded: animals used for research and educational activities, animals in animal shelters and zoos, companion animals, stray and wild animals, aquatic animals, killing for public or animal health purposes under the direction of the competent authority, humane killing traps for nuisance and fur species.

Application of this document is limited to aspects for which process or species-specific chapters are available in the OIE TAHC. At the time of publication of this document, they are:

- Chapter 7.2: Transport of animals by sea;
- Chapter 7.3: Transport of animals by land;
- Chapter 7.4: Transport of animals by air;
- Chapter 7.5: Slaughter of animals;
- Chapter 7.9: Animal welfare and beef cattle production systems;
- Chapter 7.10: Animal welfare and broiler chicken production systems; and
- Chapter 7.11: Animal welfare and dairy cattle production systems.

This document is designed to guide users in conducting a gap analysis and developing an animal welfare plan that is aligned with the OIE TAHC. It can also be used to facilitate the implementation of any public or private sector animal welfare standards that meet at least the OIE TAHC.

The scope of this document is intended to be revised as the animal welfare provisions of the OIE TAHC are supplemented or amended.

This document is designed to guide users in conducting a gap analysis and developing an animal welfare plan that is aligned with the OIE TAHC. It can also be used to facilitate the implementation of any public or private sector animal welfare standards that meet at least the OIE TAHC.
